Rink Layout 10m x 20-22m

Playline colors

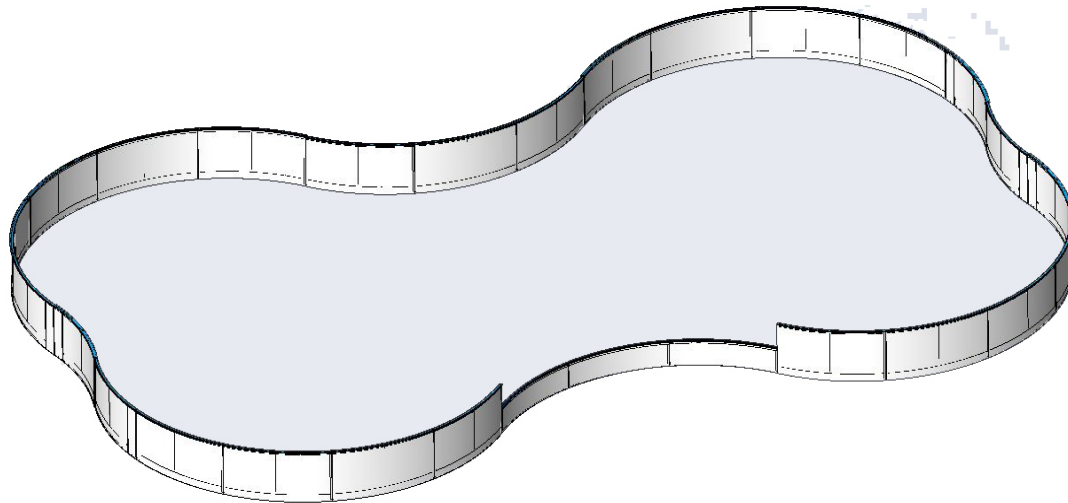

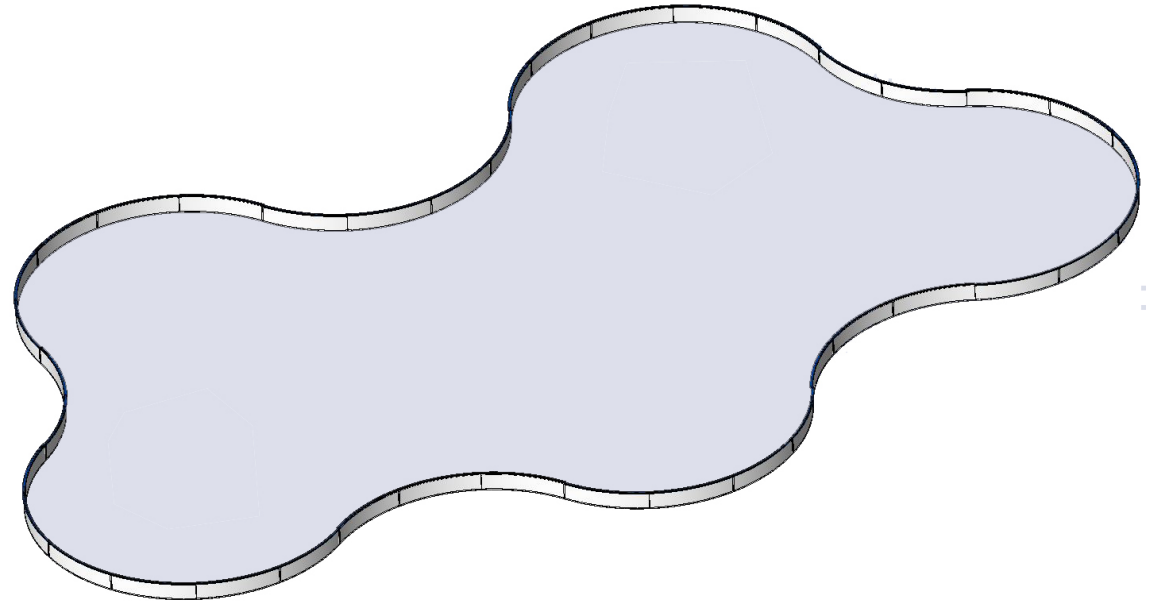

- Many colors available, but darker the color more thermal expansion
- Board thickness PE5mm
- We could select colors which we want to use and have them in stock.
- Lots of colors create long delivery time.
- Also, it is important to know if the rink is up all year around or just for winter.

Organic Playline

Playline done with curve elements, creates organic shapes

- Curve radius R4,6m H500 or HI 100,
- If the board is HI 100 we need to have door
- If the board is H500, no doors
- Mix rink with HI 100 and H500 boards, some part of the rink can be lower for easy access.

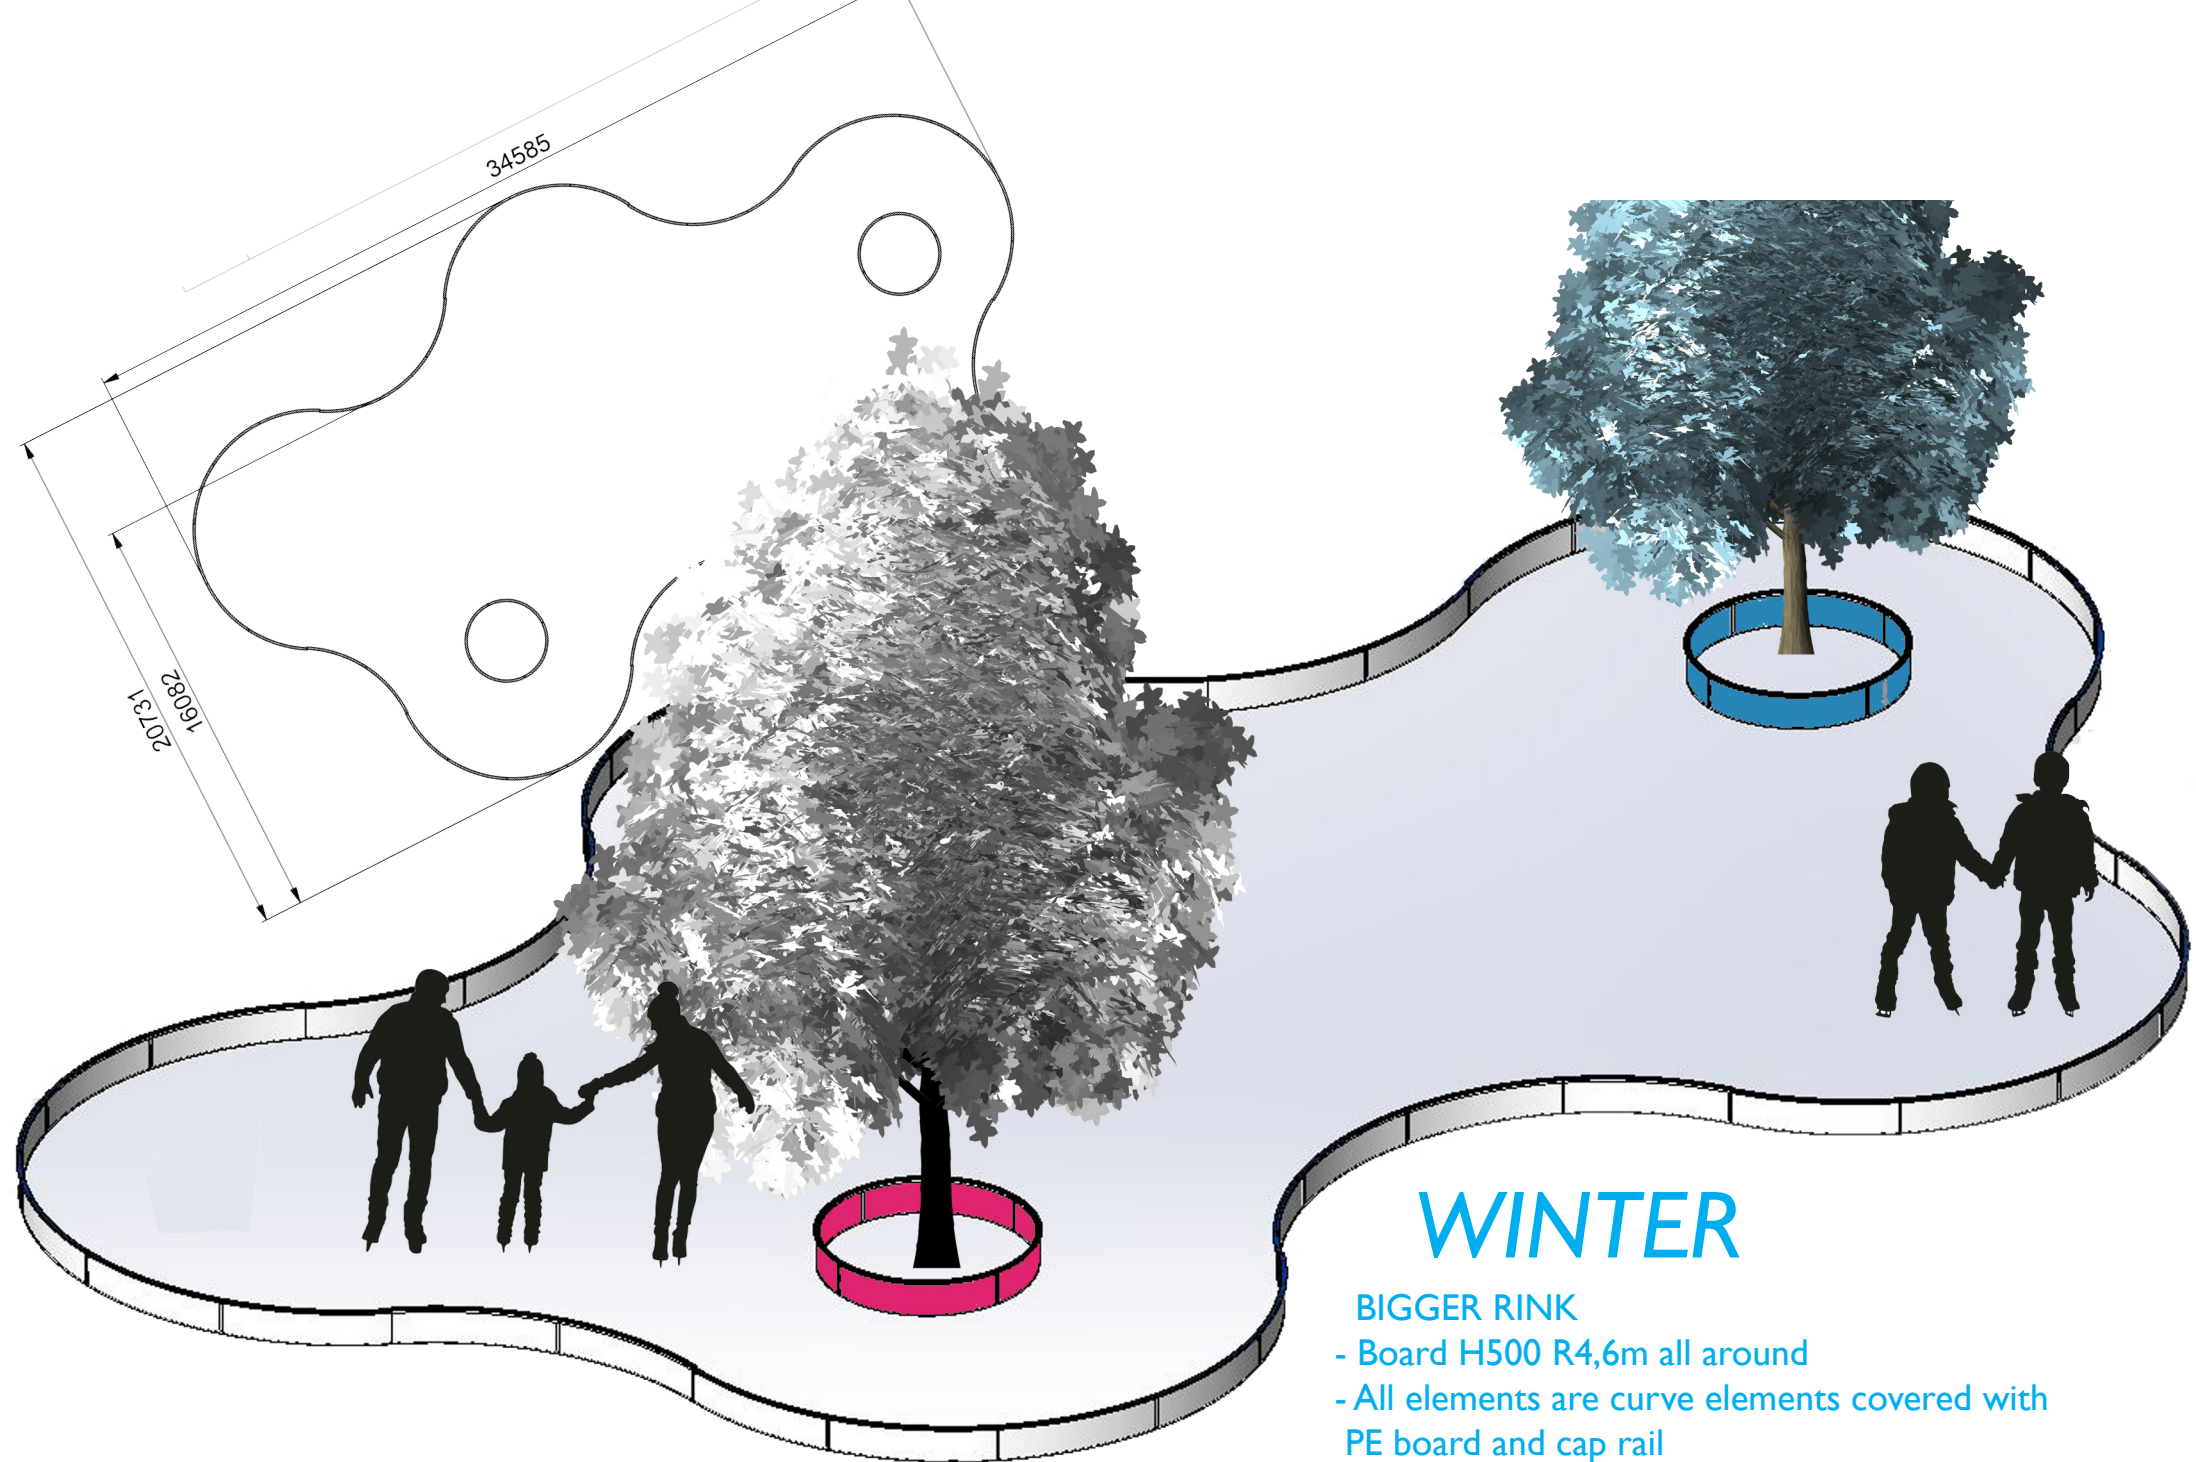

SMALL RINK

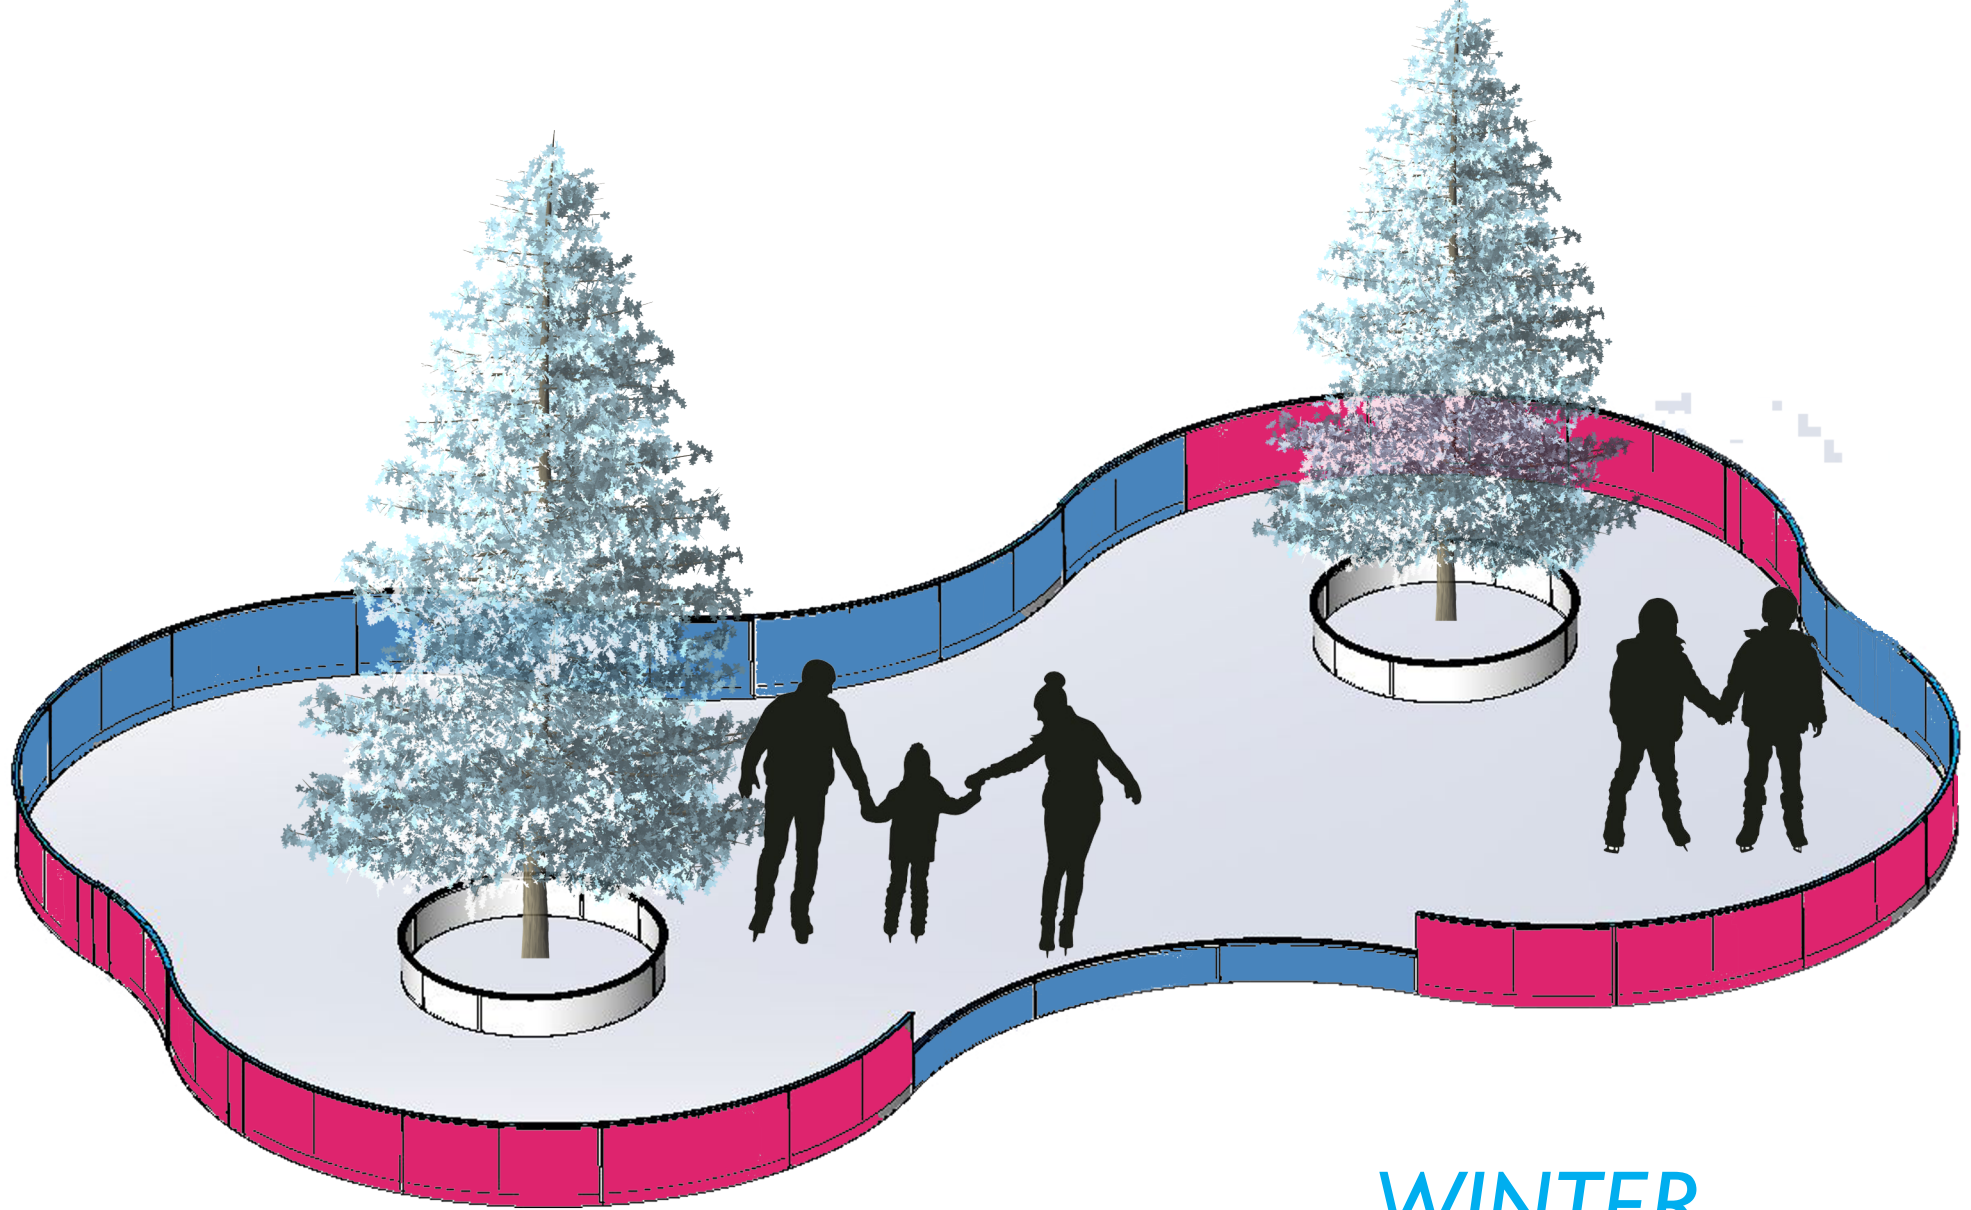

- Board HI 100 R4,6m and lower board H500 in front for easy access
- All elements are curve elements covered with PE and cap rail

SUMMER

WINTER

- BIGGER RINK**
- Board H500 R4,6m all around
 - All elements are curve elements covered with PE board and cap rail

WINTER

SMALL RINK

- Example of colors, some parts of the rink could be in different color, for example when the rink is used in special events, for example during Christmas.
